

SOLAR DISTILLATION PLANT (SOLAR STILL)

Solar Distillation Plants are designed for Outdoor installation and are capable of producing 3-4 liters of distilled water per day. FRP body with toughened glass cover ensures long operational life for the products. More than one modules can be installed for larger capacities.

TECHNICAL SPECIFICATIONS

Glazing Size	:	1 Meter X 1 Meter
Capacity Per Day	:	3-4 Liters Per Day
Thickness of Glass	:	4mm Toughened Glass
Pan	:	FRP Body
Stand	:	M.S. Angle

Solar distillation plants are designed and manufactured by M/s. Cosmo Products, the Manufacturer of Solar Thermal Products & Systems in the state of Chhattisgarh with full infrastructure along with the complete after sales service backup. Cosmo Products is registered with D.I.C. and CREDA for a range of Renewable Energy Products & Systems.
